

American Barbell Horizontal Bumper Plate Storage ST-HRB

Maximize the functionality of your workout area with the American Barbell Horizontal Bumper Storage unit, an indispensable addition to any organized gym. This portable Olympic plate holder is ergonomically designed with a front handle, complete with a foam-covered grip for comfortable and effortless maneuvering. Its sturdy metal frame, spanning 58 inches in length and 16 inches in width, offers compact and effective storage for weight plates, with a total frame height of 10 inches.

Accommodating up to 55LB/25KG plates, as well as smaller or incremental plates, the unit boasts nine plate spacings at 2.5-inch and 5.5-inch intervals, catering to a range of plate sizes. Equipped with high-spec roller wheels, the rack can be smoothly transported around your training space, keeping plates conveniently close at hand and minimizing downtime between sets.

Perfectly suited for both commercial gyms and home fitness areas, the American Barbell Horizontal Bumper Storage unit is the ideal solution for maintaining an organized workout environment and ensuring easy access to plates, thus enhancing the efficiency and productivity of your training sessions.
